

CTH-8550 integrated amplifier – key activation

Important Information to all customers (subject to change)

REGISTRATION:

Your **CTH-8550 will only work for 15 minutes** until it will be officially registered.

Anticipated registering procedure is possible if you firmly ordered your CTH-8550 and asked your dealer for getting your machine already activated at factory.

Registration procedure:

Your CTH-8550 is provided with a programming USB key.

This key is blank when receiving your machine.

As soon as we will receive your registration enquiry at keyactivation@dartzeel.com, we will e-mail you the key activation software in a zip folder.

Once this file extracted onto the USB key, you could activate your CTH-8550 by inserting the key on the rear USB port, following instructions from the menu.

USB key activation procedure:

1. Unzip the key activation software from the zip folder, and directly copy the .dtz file on the USB key, using your computer. **DO NOT ALTER THE FILE NAME!**
2. Insert the USB key in the rear panel of your CTH-8550.
3. From the front panel, press Menu ► Parameters ► Diag ► DTZ.
4. The file will be uploaded.
5. Remove the USB key.

At registration enquiry time, please note that your owner name cannot exceed 14 characters max length, in order to properly fit into the CTH-8550 display window. So please try to choose “J.D. Smith” rather than “Jonathan Donald Smith”....

Musically yours,

the darTZeel team
